

Cellular M2M: Generating Profit from the Business Opportunities

Contents

- 1 Executive Summary**
 - Overview
 - Key Findings for Market Players
 - Strategic Recommendations

- 2 Introduction**
 - Scope of Study
 - A Question of Definition
 - Network Operators Missing the Boat?
 - Report Brief

- 3 Analysis of Cellular Machine-to-Machine Applications**
 - Why Cellular?
 - Machine-to-Machine versus Other Mobile
 - Application Groups in More Detail
 - The Vending Community*
 - Vending Machines*
 - Retail and Point of Sale*
 - Wireless POS*
 - Wireless ATM*
 - Parking*
 - Metering/Monitoring*
 - Residential Metering*
 - Industrial Metering*
 - Remote Monitoring/Control*
 - Security and Surveillance*
 - Home/Office*
 - Industrial Automation*
 - Manufacturing Processes*
 - SCADA*
 - Public Transport Infrastructure*
 - Intelligent Transport Services (ITS)*
 - Road pricing*
 - Passenger information*
 - Use on Railways*
 - Public Information Services*
 - Billboards*
 - Location-based Services*
 - Interactive Displays*
 - Telemetry*
 - Kiosks*
 - Others*
 - Auto Telematics*
 - Fleet/Freight Management*
 - Fleet Management*

Freight Management
Emergency and Special Services
Telemedicine
Comparison of Application Group Characteristics
Applications in the Future

4 Cellular versus Other Wireless Technologies

Anatomy of an M2M Solution
Wireless Technology Alternatives
Bluetooth
CDMA
1xRTT/CDMA2000
DSRC
GSM/SMS and USSD
GSM-R
GPRS
HSCSD
EDGE
PDC/PHS
RFID
TETRA
Ultra-Wideband (UWB)
WLAN
ZigBee
Proprietary Wireless Data Networks
Control Channel, Packet Radio, Paging
Comparison for M2M use
Review of Standards

5 Enabling the M2M Market

Public Policy Issues
The Transport Imperative
Energy Conservation
The Growing Healthcare Need
Security Concerns
Other Policy Issues
Where's the Benefit?
Key M2M Market Enablers
Which User Segments?
Identifying the Business Benefits
The Forces Driving the M2M Market
Towards a Competitive Market

6 Worldwide Cellular Market Forecasts 2003-08

Assumptions and Outline Methodology
Application Group Projections 2003-08
Cellular Module Projections: Units & Revenue 2003-08
Module Price Reduction
Units & Revenue Projections
M2M versus Mobile Phone Growth

Managed Services Revenue Projections 2003-2008

ARPU's for Managed Services

Managed Service Revenue Projections

Mobile Network Revenue Projections 2003-08

ARPU's for Mobile Networks

Network Revenue Projections

Comparison of M2M with Other Mobile Revenue Streams

ICT Sales Projections 2003-08

Outline Methodology

ICT Sales Projection

Sensitivity Analysis

Implications of Projections

7 Value Analysis of Cellular M2M

Extending the Value Chain

Requirements for Service Provision

Improving the Value of the Business

Barriers to Growth

Mobile Networks

Standards Issues

Network Approval

Market Structure

Educating the User

Connecting to the Network

Moving the Market Forward

8 Opportunities for Market Players

Current Business Models

Opportunities in the Value Chain

Module/Modem Supply

Machine Supply

Mobile Network Operators

ISP

Solution Provider/System Integrator

Service Provider

Machine Operator/End User

Network Operators – Pipeline or Service Provider?

Implications for Market Players

Convergence on Service Provision

Opportunities for Proprietary Data Networks

The Need for Speed

Strategies for M2M Partnerships

9 Conclusions and Recommendations

Critical Success Factors

Mobile Network Operators: Time to Decide

Service Provider Market Entry Issues

Priorities for Solution Providers

Conclusions
